Hi Lisa,

The poles may be in, but the power is still needed through LADWP, and BSL needs to do there part. LADOT still needs to install the traffic signal equipment on the new poles. Once DWP and BSL complete their work, striping would need to be installed and modified at the intersection.

Dear Jeannie:

I was out at the location this morning and the poles are already installed with covers on the lights. That is why I am making the inquiry. Do more poles need to be installed. Let me know so that I can report to the Board. Thank you

Hi Lisa,

There still some work to be done. Our crews are digging the foundations for 2 BSL/DOT poles and installing the riser for the DWP Power Service. The foundations will be poured early next week, and the poles will be set by the following week. Once the poles are set, BSL will be contacted so they can do there part. I will submit the DWP service request early next week and hopefully DWP will respond within 2 to 3 weeks. So with this info, figure 4 to 5 weeks to complete. Other departments are involved and we have no control of their schedules so this is just a rough estimate, it may be sooner or go a little longer.

Regards,

Dear Jennie:

Just to let you know, I am now the Executive Director of the Hollywood Media District BID (Formally DCOS with Councilmember LaBonge) - I know that we have never met formally however we have exchanged several email in the past. I am curious about the new signal at Vine & Warning and when it is coming on line. Can you please provide me an update as the Board Members have inquired? Look forward to working with you and your team in the near future.

Thank you
